EURICAN DA²PPi²

SA Reg No. G2441 Act/Wet 36/1947.
Namibia Reg. No. V08/24.1/909 (NS2).
Zimbabwe Reg. No. 2001/80.23.15/9585 (PPV)

EURICAN DA²PPi² + L

SA Reg No. G2439 Act/Wet 36 / 1947.
Namibia Reg. No. V07/24.1/937 (NS2)

EURICAN DA²PPi² + LR

SA Reg. No. G 2440 Act 36 / 1947.
Namibia Reg. No. V07/24.1/938 (NS2).
Zimbabwe Reg. No. 2002/80.23.15/9596 (PPV)

INDICATIONS

EURICAN DA²PPi²: The vaccination of healthy dogs against canine distemper (CD), infectious canine hepatitis (ICH) caused by canine adenovirus type 1 (CAV-1), respiratory disease caused by canine adenovirus type 2 (CAV-2), canine parvovirus (P) and parainfluenza type 2 (Pi²) infections.

EURICAN L: The vaccination of healthy dogs against *Leptospira canicola* and *Leptospira icterohaemorrhagiae* infections.

EURICAN LR: The vaccination of healthy dogs against rabies, *Leptospira canicola* and *Leptospira icterohaemorrhagiae* infections.

The above Eurican range of vaccines can safely be given to susceptible puppies and pregnant bitches.

COMPOSITION

Eurican DA²PPi² contains live freeze-dried Canine distemper, Canine adenovirus type 2, Canine parvovirus and parainfluenza type 2 virus.

Eurican L contains inactivated *Leptospira canicola* and *Leptospira icterohaemorrhagiae* antigens as diluent for reconstitution. Preservative is merthiolate <0,1 mg/ml

Eurican LR (liquid component) contains inactivated *Leptospira canicola* and *Leptospira icterohaemorrhagiae* antigens and inactivated fixed rabies virus together with adjuvant aluminium hydroxide, is supplied as diluent. Preservative is merthiolate <0.1 mg/ml.

WARNINGS

- Keep out of reach of children, uninformed persons and animals.
- Vaccinate only healthy animals.
- Although this vaccine has been extensively tested under a large variety of conditions, failure thereof may ensue as a result of a wide range of reasons. If this is suspected notify the registration holder.

PRECAUTIONS

- Take the usual aseptic precautions.
- Some animals may fail to develop or maintain immunity due to relative immunological incompetence.

SIDE EFFECTS

All vaccines may occasionally cause anaphylactic reactions in some dogs; if this occurs adrenaline or equivalent should be administered.

The presence of aluminium hydroxide in the **Eurican LR** component may occasionally cause the appearance of a small transitory nodule at the point of injection.

DOSAGE AND DIRECTIONS FOR USE

Aseptically reconstitute the freeze dried viral components with the liquid fraction.

Shake well before use.

DOSE: 1 ml by subcutaneous or intramuscular injection.

Primary vaccination:

- A single injection of the distemper / infectious hepatitis / parvovirus / parainfluenza component (**Eurican DA²PPi²**) is sufficient to induce immunity in seronegative animals. However, due to the presence of interfering maternal antibodies it is recommended that at least 2 injections of these valencies be given.
- The second should be administered after 12 weeks of age
- Two injections, 2 - 4 weeks apart, are necessary to induce immunity to the leptospira antigens.
- For rabies, a single injection is given after 12 weeks of age

The following general vaccination schedule is recommended:

| | |
|-----------|---|
| 6-8 weeks | Eurican DA²PPi² + L |
| 12 weeks | Eurican DA²PPi² + LR |
| Annual | Eurican DA²PPi² + LR |

The following vaccination schedule is recommended to provide protection against the most important canine diseases.

| | |
|-----------|---|
| 4-5 weeks | Primodog |
| 6-8 weeks | Eurican DA²PPi² + L |
| 12 weeks | Eurican DA²PPi² + LR |
| Annual | Eurican DA²PPi² + LR |

STORAGE

Store at between +2 °C to +8 °C in a refrigerator. Do not freeze. Protect from light.

PRESENTATION

EURICAN DA²PPi²: Each pack contains 10 vials of **Eurican DA²PPi²** and 10 vials of **Diluent**.

EURICAN DA²PPi² + L: Each pack contains 10 vials of **Eurican DA²PPi²** and 10 vials of **Eurican L**.

EURICAN DA²PPi² + LR: Each pack contains 10 vials of **Eurican DA²PPi²** and 10 vials of **Eurican LR**.
